Professional Summary

Results-driven DevOps Engineer with progressive experience spanning cloud operations and infrastructure automation in enterprise environments. Skilled in designing CI/CD pipelines, provisioning Infrastructure as Code, and orchestrating containerized workloads to accelerate software delivery and strengthen system reliability. Proficient in Linux system administration, Python and shell scripting for automation, Git/GitHub-based version control, Terraform and Ansible for Infrastructure as Code, Jenkins and Azure DevOps for CI/CD, and Docker and Kubernetes for containerization and orchestration. Proven track record of transitioning cloud operations expertise into end-to-end DevOps ownership, with a consistent focus on automation, scalability, and minimizing release friction. Seeking a DevOps or Cloud Engineering role to drive infrastructure automation and operational excellence.

Work Experience

DevOps Engineer

April 2025 – Present

Netseems Ventures Pvt. Ltd.

Pune, India

- Architected and maintained end-to-end CI/CD pipelines using Jenkins and Azure DevOps, streamlining build, test, and deployment workflows across multiple environments.
- Provisioned and managed scalable cloud infrastructure as code using Terraform, improving consistency and cutting manual configuration effort.
- Automated configuration management, deployment, and routine operational tasks using Ansible playbooks and Python/shell scripting.
- Containerized and deployed applications using Docker, and managed orchestration and scaling with Kubernetes.
- Partnered with development and operations teams to embed DevOps best practices, improving release frequency and deployment reliability.
- Maintained version control standards and collaborative workflows for the engineering team using Git/GitHub, including branching strategies and code reviews.

Cloud Engineer

March 2024 – April 2025

Netseems Ventures Pvt. Ltd.

Pune, India

- Administered and monitored Azure cloud infrastructure, including virtual machines, networking, and access controls, to ensure high availability.
- Performed Linux system administration and wrote automation scripts to streamline server configuration, troubleshooting, and maintenance.
- Established early CI/CD and automation workflows, laying the foundation for the transition into a dedicated DevOps role.
- Monitored system performance and proactively resolved infrastructure issues to maintain consistent service reliability.

Cloud Engineer – Training

October 2023 – March 2024

Netseems Ventures Pvt. Ltd.

Pune, India

- Completed structured training in Azure cloud fundamentals, Linux administration, scripting, and core networking concepts.
- Gained hands-on exposure to cloud resource deployment, monitoring tools, and version control using Git.
- Supported the cloud operations team with troubleshooting, documentation, and process improvement tasks.

Projects

Azure Infrastructure Management

Managed Azure Virtual Machines, Virtual Networks, Storage Accounts, monitoring, backup management and production support operations.

Technologies: Azure, Linux, Monitoring, Backup

Jenkins CI/CD Pipeline

Created CI/CD pipelines using Jenkins integrated with GitHub repositories for automated build and deployment workflows.

Technologies: Jenkins, GitHub, Docker

Terraform Infrastructure Automation Lab

Built Infrastructure as Code templates using Terraform to provision Azure resources including Virtual Machines, Networking and Storage.

Technologies: Terraform, Azure, GitHub

Technical Skills

- Cloud Platforms: Microsoft Azure, Azure DevOps
- CI/CD: Jenkins, Azure DevOps Pipelines
- Infrastructure as Code: Terraform, Ansible
- Containers & Orchestration: Docker, Kubernetes
- Programming & Scripting: Python, Bash/Shell Scripting
- Version Control: Git, GitHub
- Operating Systems: Linux, Windows Server
- Other Skills: Automation, Configuration Management, Troubleshooting, Technical Documentation

Education

B.Tech, Dr. APJ Abdul Kalam Technical University

2020 – 2024

CGPA: 7.3

Certifications

- Microsoft Certified: Azure Administrator Associate (AZ-104)
- Microsoft Certified: Azure Data Engineer Associate (DP-203)
- Microsoft Certified: DevOps Engineer Expert (AZ-400)
- Oracle Cloud Infrastructure Generative AI Professional
- Oracle Cloud Infrastructure DevOps Professional
